

*Make Lending Simple*

# Compass Technologies

## Industries We Serve

### Auto Financing

The new Kwik-Dealer portal from Compass makes lending to auto dealers a breeze. Prospects can apply online from the dealer's showroom for the purchase of their choice. Kwik-Dealer pulls the credit bureau information, populates the application and gives the dealer a fast approval or denial. Dealers can close loans for qualified buyers nights and weekends, even when your office is closed.

### Education Financing

Take applications for Education Loans over the internet or in your office. The Compass Kwik-Decision portal filters all the credit information and gives you a quick answer for qualified borrowers...or prints a turndown letter if the loan is not approved. With more parents opting for private schools and supplements for college tuition, you can compete in the growing education finance market.

### Furniture and Appliance Financing

With the Compass Kwik-Dealer portal, you can reach out to furniture and appliance dealers who may be missing big deals they can't finance. You can even help dealers setup an internet loan application system so prospective buyers can get qualified for certain credit limits, even before they visit the dealer's showroom.

### Medical Financing

With the cost of medical services and equipment rising each year (and insurance coverage failing to meet some of these costs), you can work with doctors, dentists and medical equipment suppliers to finance needed procedures and equipment. Patients can apply over the internet, where they can also review their credit limits, or fill out an application in the physician's office.

### Retail Financing

With the price of merchandise increasing and many folks maxed out on their credit cards, many retailers are looking for new areas for retail installment lending. The Kwik-Dealer portal from Compass allows you to work with all types of businesses to finance purchases for their customers.

### Small Loans

For over twelve years now, Compass has been a leader in innovative financing for small personal loans. We help you build a decisioning model that allows you to qualify potential borrowers in a matter of minutes. You can take applications in a store or over the internet and quickly disburse funds by ACH, check or with a branded debit card. And the Compass collection system helps you promptly and efficiently address any past due accounts.
